

Caring For Our Community

Sustainable = having a great lifestyle now that won't wreck the future.

Joseph Thomas is passionate about saving water. He's exhibiting his NZ made Stylemagic waterless carwash at the show which he says uses only two litres of water (to rinse the cloth) and doesn't scratch your car. "In Kapiti we use around 11 million litres of water a day. Washing your car uses around 400 litres," says Joseph.

The word 'sustainable' is on many people's lips. But what does it mean in a practical sense? To find some easy and cheap ways to make it common practice - like using less water, warming your home, recycling - come to the show.

This show is your chance to ask questions, see how others do it, check out what products are available, and listen to the experts. April 5-6, 9am-4.30pm, Kapiti Primary School playing fields, Paraparaumu. Visit www.kapiticoast.govt.nz for a full programme.

Being Sustainable Is Easy

The Kapiti Sustainable Home and Garden Show April 5th & 6th

This show is run by Kapiti Coast District Council. Christian Judge, council's Energy Manager says being sustainable is about "doing simple things that will leave us better off financially, and help the planet".

Easy ways to be sustainable (and save cash):

- Insulate your home (you'll be more comfortable and save money in the long term)
- Grow your own veges (nothing tastes better)
- Save water
- Change light bulbs to energy saver bulbs (they pay for themselves in a few months)

Offering you

\$400 discount when you buy a **HEAT PUMP**

Plus be in the draw to win up to \$1000 credit on your power account when you place an order before the end of May 2008.
